Where international, state, and/or county boundaries coincide, the map shows the boundary symbol for only the highest-ranking of these boundaries.

- 1 A "1" following a place name indicates that the place is coextensive with a MCD. A "2" indicates that the place is also a false MCD; the false MCD name is shown in parentheses.
- 2 This map shows tribal census tract boundaries and numbers within the subject entity; nontribal census tract boundaries are shown outside of the subject entity. The subject entity must be a reservation, a recognized American Indian reservation or off-reservation trust land for the purpose of providing data based on an American Indian hierarchy rather than by state and county. Where reservation boundaries coincide with international, state, and/or county boundaries, the tribal census tract number may be assigned on both sides of the boundary, and, if so, constitutes a single tribal census tract entity.
- 3 A "3" following a block number indicates that the block number is repeated elsewhere in the block.
